

Pablo Batista

FRONT-END DEVELOPER

EXPERIENCE

FRONT-END DEVELOPER

Smart Age Solutions | 02/2020 - Currently

Responsible for designing, building and optimizing the Magento platform interfaces. Development in HTML, CSS, JavaScript, JQuery, PHP and React, producing the layout of the digital product and creating interactivity between the elements of the page or application. Thus, the professional is not part of a single team, but usually moves between the areas of design and back-end development.

FRONT-END DEVELOPER INTERN

UNISUAM(University) | 08/2018 - 02/2020

Responsible for programming the front of the web application, basically, the front-end developer is responsible for transforming the design created by the Web Designer into HTML and CSS code. The developer also works with programming languages, among the best known, highlighting the most traditional ones: Java, PHP, C #, C, C ++ and among others.

DATABASE CONSULTANT

Scientific initiation scholarship(Pibic - CNPq) | 05/2019 - 02/2020

I am one of the founders of the SOD System, a project within UNISUAM that is the creation of a data optimization system, where the main focus is to create an ERP system that collects data from the institution's practice centers and in the end occurs modeling them. He worked directly with MySQL / SQL, Google Data Studio and PowerBI.
